The screenshot shows the IBM Cloud Watson Assistant creation interface. The top navigation bar includes the IBM Cloud logo, a search bar, and links to Catalog, Manage, and the user's account (S S V K Sahit's Account). The main content area is titled "Watson Assistant" and includes a description: "Watson Assistant lets you build conversational interfaces into any application, device, or channel." Below this, there are tabs for "Create" and "About". The "Create" tab is active, showing a "Select a location" dropdown menu with "Sydney (au-syd)" selected. Below this is a "Select a pricing plan" section with a table of plans. The table has three columns: Plan, Features, and Pricing. The "Lite" plan is selected, showing features like "Up to 1,000 unique monthly active users (MAUs) chatting with your assistant" and "Up to 10,000 messages per month". The pricing is listed as "Free". On the right side, there is a "Summary" panel showing the instance name "Watson Assistant", location "Sydney", plan "Lite", service name "Watson Assistant-68", and resource group "Default". A warning message states: "Existing Lite plan instance. You can have only 1 Lite plan instance of this service per resource group. Delete your current Lite plan instance in Default resource group to create a new one, or view the existing instance." At the bottom right, there is a checkbox for "I have read and agree to the following license agreements:" with a link to "Terms".
